

It's what's inside that counts

Help transform the look of your skin with the #1 physician-dispensed skin care system^{1,2}

The Obagi Nu-Derm System plus 1.0% retinol* helps to significantly improve these visible signs of skin aging^{1,†,‡}:

- Moderate to severe melasma, unwanted age and sun spots
- Rough, uneven skin
- Skin laxity (or looseness)
- The look of fine lines and wrinkles

**Make Obagi Nu-Derm a part of your daily skin care routine.
Contact our office today to see which Obagi Nu-Derm system is right for you!**

For more information about other Obagi products, visit www.obagi.com.

*Sold separately.

†Study results for a 24-week evaluation of the efficacy and tolerability of twice-daily use of the Obagi Nu-Derm Normal to Oily System with 1.0% retinol; N=33.

‡If you see no improvement after 12 weeks, please discontinue use of the system. The safety of this system has not been evaluated beyond 24 weeks.

Clear and Blender® in the Obagi Nu-Derm Systems contain 4% hydroquinone.

Important Safety Information for Obagi Nu-Derm Clear and Blender

CONTRAINDICATIONS:

People with prior history of sensitivity or allergic reaction to this product or any of its ingredients should not use it. The safety of topical hydroquinone use during pregnancy or in children (12 years and under) has not been established.

WARNINGS:

Avoid contact with eyes, nose, mouth, or lips. In case of accidental contact, patient should rinse eyes, nose, mouth, or lips with water and contact physician.

Sunscreen use is an essential aspect of hydroquinone therapy because even minimal sunlight exposure sustains melanocytic activity.

Contains sodium metabisulfite, a sulfite that may cause allergic-type reactions including anaphylactic symptoms and life-threatening or less severe asthmatic episodes in certain susceptible people. The overall prevalence of sulfite sensitivity in the general population is unknown and probably low. Sulfite sensitivity is seen more frequently in asthmatic than in nonasthmatic people.

PRECAUTIONS (ALSO SEE WARNINGS):

Treatment should be limited to relatively small areas of the body at one time since some patients experience a transient skin reddening and a mild burning sensation, which does not preclude treatment.

Pregnancy Category C: Animal reproduction studies have not been conducted with topical hydroquinone. It is also not known whether hydroquinone can cause fetal harm when used topically on a pregnant woman or affect reproductive capacity. It is not known to what degree, if any, topical hydroquinone is absorbed systemically. Topical hydroquinone should be used on pregnant women only when clearly indicated.

Nursing Mothers: It is not known whether topical hydroquinone is absorbed or excreted in human milk. Caution is advised when topical hydroquinone is used by a nursing mother.

Pediatric Usage: Safety and effectiveness in children below the age of 12 years have not been established.

Use of the product should be discontinued if hypersensitivity to any of the ingredients is noted.
